

Accessing Health: Context and Challenges for LGBT People in Central & Eastern Europe

[Report, Health, Bosnia and Herzegovina, Hungary, Moldova, North Macedonia, Romania](#)

This research project is the first of its size and scope has to be carried out among LGBT communities in Bosnia and Herzegovina, Hungary, Macedonia, Moldova and Romania. As such, the initiative is of groundbreaking importance and the data collected will serve to inform ongoing advocacy and policy work.

The report presents the findings on health and access to the health care system by the LGBT communities in five Central and Eastern European countries, as well as draws conclusions and makes recommendations to the relevant stakeholders, including international organisations. It also introduces a methodology and lessons learnt, which could be used for further research.

ILGA-Europe used the results of the research to lobby the EU Commission for the repeal of all laws discriminating on the basis of sexual orientation as a condition of accession to the Union. As of August 2005, only one out of the 13 newly acceded countries – Bulgaria – continues to have such laws.
